ChiroPillar
STRENGTH IN ALIGNMENT

The ChiroPillar Ecosystem

A Full Chiropractic Roll-Up, Technology & Growth Platform — Executive Summary

Kingdom Broker · Eric Skeldon & Dr. Scott Wagner

Confidential — Internal Working Document · June 2026

Executive Summary

ChiroPillar is a full chiropractic roll-up and growth ecosystem: we acquire and partner with independent chiropractic offices, make them measurably more profitable with shared technology and systems, consolidate them under one national brand, and create wealth on three fronts at once — operating profit, multiple arbitrage, and recurring digital and consulting revenue. The model is structured so the chiropractors we partner with earn more than they did on their own, keep upside through equity and profit share, and exit tax-efficiently — while the platform compounds value toward an institutional sale.

The thesis rests on a simple, proven arbitrage. Independent chiropractic offices are bought at roughly 3–5x earnings. Inside a professionalized platform with $5M+ of EBITDA, the same earnings are valued at 8–10x. We capture the spread twice: first by improving each clinic's profitability (the operating playbook and technology add a target of ~$250K of EBITDA per mature office), then by re-rating every dollar of that improved EBITDA at the platform multiple. The chiropractic market is large (~$8B), highly fragmented (no player above ~5% share, ~58% solo practitioners), and barely consolidated — an open, cheap, and timely runway.

What makes ChiroPillar different from a plain roll-up is the surrounding ecosystem. A free-to-start consumer app and AI/telehealth funnel feeds patients into the clinics at low cost; high-ticket consulting, masterminds, and conferences (a Gym Launch–style growth engine) monetize the broader profession and build the acquisition pipeline; and access to large doctor networks and the industry's biggest conferences gives the platform distribution most competitors lack. Technology, funnels, and brand are built by Eric Skeldon and Kingdom Broker; clinical systems and operating standards are led by Dr. Scott Wagner; and trust and tax structuring for exiting owners is handled with Nexxess and an LL.M. (tax) attorney.

In one line: buy chiropractic offices cheaply, make them more profitable and the owners wealthier, wrap them in technology, brand, and a growth machine, and sell the consolidated platform at a far higher multiple — a win for the chiropractors, the patients, and the platform.

The Acquisition & Partnership Model

We acquire or partner with offices on terms designed to be attractive to the selling chiropractor while preserving the platform's arbitrage:

- **Valuation:** purchase at a 3–5x multiple of clinic earnings (cheap at the office level).
- **Structure:** ~50% cash at close + ~50% seller financing (a seller note paid from clinic cash flow), reducing upfront capital and aligning the seller with the clinic's continued success.
- **Ongoing 4% profit share:** the partnering chiropractor receives a 4% profit share so that — combined with sale proceeds, note payments, and a lighter operating load — they earn more than they did running the office alone.
- **Rollover equity at a higher multiple:** sellers can roll a portion of their proceeds into equity in the ChiroPillar / Dr. Wagner platform, which is valued at 8–10x rather than their stand-alone 3–5x — a second, larger payday at the platform's exit.

- **Tax-efficient exit:** before they sell, owners work with Nexxess and an LL.M. (tax) attorney to set up trust and entity structures intended to reduce the tax owed on their exit proceeds.

Why the chiropractor comes out ahead (illustrative)

Example: an office producing $250,000 of EBITDA.

Component	Illustrative value
Purchase multiple	4x → $1.0M enterprise value
Cash at close (50%)	$500,000
Seller note (50%, paid from cash flow)	$500,000 + interest
EBITDA after ChiroPillar systems (+~$250K)	~$500,000
Ongoing 4% profit share	Recurring income on improved profits
Optional rollover equity → platform at 8–10x	Re-valued at 2x+ their stand-alone multiple
Operating burden	Lower — shared back office, billing, marketing

The package, not any single line, is the pitch: cash now, a secured note, a continuing profit share on a more profitable clinic, less day-to-day burden, tax-efficient structuring, and equity in a platform worth a multiple of their old business. That total is designed to exceed what they would earn continuing solo — which is what makes owners say yes.

The Full Ecosystem — Five Revenue Engines

ChiroPillar is built as layered, reinforcing revenue engines, from highest scale to highest value:

Engine	What it is
1. Clinic roll-up (core EBITDA + arbitrage)	Acquire offices at 3–5x, improve to higher EBITDA, sell platform at 8–10x.
2. App + AI/telehealth funnel	Free → $9/mo → $74/yr; low-cost patient acquisition + recurring MRR + reimbursable RTM/telehealth.
3. High-ticket consulting (Gym Launch style)	Coaching packages, masterminds, done-with-you systems for chiropractors — profit + acquisition pipeline.
4. Conferences & events	Sponsoring/booths at the largest chiropractic conferences; hosting ChiroPillar events for brand, leads, and deal flow.
5. Ecosystem services	Trust/tax setup, billing/RCM, marketing, technology, and group purchasing sold across the network.

Each engine feeds the others: consulting and conferences generate acquisition leads; the app lowers patient-acquisition cost for every clinic; the clinics give the app and consulting real-world credibility and outcomes data; and all of it compounds the EBITDA that gets re-rated at exit.

Team & Partners

- **Eric Skeldon — Kingdom Broker:** builds the technology, apps, funnels, brand, and deal structuring that power acquisition and recurring revenue.
- **Dr. Scott Wagner:** leads clinical systems, operating standards, and the per-office improvement playbook; the platform consolidates under his company at the higher multiple.
- **Nexxess + LL.M. (tax) attorney:** provide trust and tax structuring so exiting chiropractors keep more of their proceeds.
- **Doctor networks:** access to some of the largest physician/chiropractor networks for referrals, recruiting, and distribution.

High-Ticket Consulting & Events (Growth Engine)

Modeled on the Gym Launch / high-ticket info-and-implementation playbook, this layer monetizes the wider profession and doubles as the acquisition pipeline:

- Tiered offers: low-cost workshop/challenge → core coaching program → high-ticket mastermind / done-with-you platform onboarding.
- Live events and conferences that build the ChiroPillar brand, generate qualified leads, and surface acquisition targets (the best-performing attendees become partners).
- Recurring software + services (app, billing, marketing) attach to every consulting client, turning education into long-term revenue.

Conference Sponsorship Strategy

Sponsoring and exhibiting at the largest chiropractic conferences puts ChiroPillar in front of thousands of owners — for brand, consulting leads, and acquisition conversations. Priority targets:

Event	2026 timing	Scale	Why it matters / booth fit
Parker Seminars — Las Vegas	Feb 26–28	World's largest; thousands of attendees, 64 speakers, 15 tracks (75th anniv.)	Flagship sponsorship — maximum reach & prestige.
The National by FCA — Orlando	Aug 27–30	3,300+ attendees, ~420-booth expo, 70+ speakers	Largest expo floor — best for a booth and demos.
California Jam (Cal Jam)	Spring (So. Cal.)	2,000+; fast-growing, high-energy	Practice-builder / entrepreneurial crowd — ideal for consulting offers.
CalChiro & state association events	Throughout 2026	Regional	Geo-targeted to clinic-acquisition markets.
Technique/philosophy seminars (e.g., DE, CBP)	Throughout 2026	Engaged niche audiences	Credibility with high-volume, systems-minded DCs.

Recommended play: anchor brand presence with a Parker Seminars sponsorship, run the primary lead-gen booth at The National by FCA (largest expo), and use Cal Jam to sell the high-ticket consulting offer — then concentrate follow-up where ChiroPillar clinics and acquisition targets are located.

Why It Wins

- **Owners win:** more money, less burden, equity upside, tax-efficient exit.
- **Patients win:** free app, better access, telehealth, and consistent quality care.
- **Platform wins:** cheap deal flow, multiple arbitrage, recurring revenue, and a brand + distribution moat the digital-only and clinic-only competitors can't match.
- **Timing wins:** chiropractic is where dental/vet were before consolidation — early, fragmented, and cheap.

Immediate Next Steps

1. Stand up the MSO/PC and trust/tax structure with counsel (Nexxess + LL.M. attorney).
2. Acquire 1–2 anchor offices on the 3–5x, 50/50, 4% profit-share terms; prove the per-office uplift.
3. Launch the MVP app + funnel in anchor markets; begin RTM/telehealth billing through providers.
4. Book Parker Seminars and The National by FCA presence; build the high-ticket consulting offer.
5. Build the acquisition pipeline via consulting/conferences; scale toward $5M+ platform EBITDA and an institutional exit.

Sources & Disclaimers

- Parker Seminars Las Vegas 2026 — world's largest chiropractic event (GlobeNewswire)
- The National by FCA — overview (3,300+ attendees, 420-booth expo)
