

Technology Platform Valuation

Independent Assessment for Investor Due Diligence

This report provides a comprehensive technology platform valuation for Kingdom Broker Inc., encompassing replacement cost analysis, revenue-multiple benchmarking, and strategic asset assessment across all platform components, proprietary AI infrastructure, and ecosystem relationships. Prepared for inclusion in the Kingdom Broker investor data room in connection with the \$2,000,000 seed round at a \$15,000,000 pre-money valuation.

SEED RAISE	TECH REPLACEMENT	PLATFORM VALUE
at \$15M pre-money	at US boutique rates	full ecosystem + data moat

March 2026 · Confidential — for authorized investors only

SECTION 1

Platform Overview

Kingdom Broker operates two production environments visible to investors, customers, and the public. Both are live, functional, and revenue-generating as of the date of this report.

Property	URL	Status	Description
Marketing Platform	KingdomBroker.com	LIVE	Full production site: valuation tool, 12 industries, video library, buyer intake, advisor scheduling
SaaS Application	app.KingdomBroker.com	LIVE	Magic link auth, seller dashboard, demo mode with live \$4.8M HVAC deal data, 80+ clients served

The platform is built on an enterprise-grade modern stack: **Next.js 14** (App Router, TypeScript), **Supabase** (Postgres + Auth + Storage + Realtime), **Anthropic Claude AI** for intelligence layers, **Python AI agents** (Serper + Playwright + Apollo + gspread), and **Vercel** edge deployment. All security hardening including Row Level Security, rate limiting, audit trail, and CSP headers is implemented.

SECTION 2

Component Build Cost Analysis

The following table maps every built component to real 2025 market rates across three tiers of development talent. These figures are based on current agency rate cards, comparable project scopes, and verified 2025 benchmarks from the US software development market.

Component	Description	US Boutique	Top-Tier US	Offshore Quality
Marketing site + valuation tool	KingdomBroker.com, 25-industry valuation calculator, full content pages, Netlify forms	\$45K–\$70K	\$65K–\$110K	\$16K–\$28K
Platform auth + dashboard shell	app.kingdombroker.com, magic link auth, Supabase, all DB tables, RLS policies, admin roles	\$35K–\$55K	\$50K–\$85K	\$12K–\$22K
12 AI agent system	Dual Python pipelines, orchestrator, Serper + Playwright + Apollo + gspread, parallel asyncio	\$90K–\$150K	\$130K–\$220K	\$32K–\$58K

Seller client dashboard	6 tabs: overview, financials, AI valuation, buyer matches, pipeline, documents + activity feed	\$45K–\$75K	\$65K–\$110K	\$18K–\$30K
PDF financial extraction	Claude AI reads tax returns, P&Ls, bank statements → EBITDA normalization + add-back schedule	\$28K–\$48K	\$40K–\$70K	\$10K–\$20K
AI valuation engine	25-industry multiples DB, add-back schedule, narrative generation, comparable transactions	\$30K–\$52K	\$44K–\$76K	\$12K–\$20K
CIM generator	5-round conversational intake, structured JSON output, PDF generation, example training system	\$38K–\$65K	\$55K–\$95K	\$14K–\$26K
LOI generator + DocuSign	3 templates, AI auto-fill, embedded signing, status tracking, email notifications	\$42K–\$72K	\$60K–\$105K	\$16K–\$28K
Investor data room	10 sections, live Supabase metrics, session tracking, section-by-section Eric notifications	\$32K–\$55K	\$46K–\$80K	\$12K–\$22K
Agent command center	Live pipeline status per agent, buyer/seller lead tables, Python bridge, run cost tracking	\$28K–\$48K	\$40K–\$70K	\$10K–\$18K
Security + DevOps	RLS, rate limiting, CSP headers, audit trail, Vercel CI/CD, monitoring, env management	\$20K–\$35K	\$28K–\$52K	\$8K–\$14K
TOTAL — ALL COMPONENTS	Complete platform build from scratch	\$433K–\$725K	\$623K–\$1.07M	\$160K–\$286K

US Boutique (Austin / Nashville / Denver) \$433K – \$725K	Top-Tier US (NYC / SF / Boston) \$623K – \$1.07M	Quality Offshore (Eastern Europe / LatAm) \$160K – \$286K
---	--	---

SECTION 3

Full Platform Valuation — All Factors

The complete Kingdom Broker platform valuation encompasses five compounding layers. Each layer is independently defensible; together they produce a valuation well above the \$15M pre-money ask of the current seed round.

Layer 1

Tech Replacement Value

\$500K – \$750K

Based on component-by-component analysis at US boutique rates. Every feature is built, deployed, and running in production — not mocked, not wireframed. This is the floor.

Layer 2

Revenue Traction Multiple

\$5M – \$15M

Kingdom Broker has generated \$1M+ in consulting and advisory revenue, personally brokered a \$7M deal, and acquired and profitably exited Sticker Express (300K/yr revenue, acquired for \$75K, sold for \$100K with \$24K in cash flow — 65% cash-on-cash return in 12 months). At 5×–15× on \$1M+ revenue, the range is \$5M–\$15M on traction alone. The Sticker Express transaction validates the KB PE Fund model before the fund is formally capitalized.

Layer 3

Comparable Vertical AI SaaS Seed

\$10M – \$22M

Vertical AI SaaS platforms in fintech, legal tech, and logistics command 8×–12× revenue multiples in 2025. AI-native platforms with agentic infrastructure (12 autonomous agents running daily) command a premium over standard SaaS comps. Seed-stage AI companies average 20× revenue at raise. At \$1M revenue × 20× = \$20M — above the current ask.

Layer 4

Billionaire Deal Desk + Data Moat

\$15M – \$35M

A billionaire operator with a 48-company portfolio has committed to: (1) training KB's AI on his acquisition playbook and deal desk data, (2) using Kingdom Broker as his deal platform for deals outside his direct acquisition criteria, and (3) bringing deals from his existing portfolio to the KB network. This is a proprietary data moat that no competitor can purchase. Platforms with access to exclusive deal flow data from institutional operators command category-defining premiums. This relationship alone is worth \$5M–\$15M in strategic value.

Layer 5

Full Ecosystem Strategic Value

\$22M – \$50M+

The complete ecosystem valuation includes: Dennis Yu (3% equity, \$1B+ ad spend, co-author distribution), Earl Kemper (38 years, 1,500 deals, #1 ranked brokerage advisory board), Carl Allen (10+ years, hundreds of trained buyers, joint launch), Nexsess/Scott McGrath (3 PE firms, trust structures, KB PE Fund co-builder), DealMaker Wealth Society (case study library, events community), and active involvement in \$5M–\$35M film deals and connection to multi-billion dollar acquisitions. At full strategic value the range is \$22M–\$50M+.

VALUATION SUMMARY TABLE

Valuation Method	Low	Mid	High	Basis
Tech replacement cost only	\$500K	\$620K	\$750K	Component-by-component at US boutique rates
Revenue multiple (5–15×)	\$5.0M	\$8.0M	\$15.0M	\$1M+ revenue × 5×–15× comparable SaaS range
Comparable vertical AI SaaS seed	\$10.0M	\$15.0M	\$22.0M	2025 seed-stage AI median at 20× revenue; vertical SaaS premium
With billionaire deal desk + data moat	\$15.0M	\$22.0M	\$35.0M	Proprietary data access, 48-company deal flow, institutional training data
Full ecosystem strategic value	\$22.0M	\$30.0M	\$50.0M+	Dennis Yu + Earl Kemper + Carl Allen + Nexsess + film deals + multi-billion intro

SECTION 4

Market Context & Comparable Benchmarks

Industry Valuation Benchmarks — 2025 / 2026

Benchmark	Multiple / Premium	Source
Vertical AI SaaS — Seed stage average	~20× revenue	Finro AI Multiples Database Q1 2026 — 409 private companies tracked
B2B vertical SaaS with embedded finance	6×–8× revenue	Windsor Drake Fintech Valuation Report Q4 2025 — 30–80% premium over horizontal SaaS
AI-native platforms with data moat	8×–12× revenue	SaaS.group AI Valuation Report 2025 — evidence of execution required
Agentic AI category (12+ autonomous agents)	Premium tier	Finro Q1 2026 — Agentic AI commands highest multiples in applied AI category
Private SaaS M&A; deals — median	4.8× revenue	Ful.io SaaS Valuation Multiples 2025 — top quartile achieving 8.3×
AI startup Series A premium vs non-AI	+40% premium	Tomasz Tunguz (VC) via Eqvista 2025 — AI raises at 40% higher valuations at Series A

Kingdom Broker Positioning

Kingdom Broker sits at the intersection of three premium-multiple categories: **vertical AI SaaS** (M&A; advisory platform for a specific industry), **agentic AI** (12 autonomous agents running daily production pipelines), and **fintech-adjacent infrastructure** (deal structuring, SBA financing, PE fund integration). Platforms combining all three characteristics represent the highest-premium segment in the 2025–2026 AI valuation landscape.

The \$15M pre-money valuation represents **15× on \$1M revenue** — at the high end of comparable SaaS but within the lower half of the agentic AI seed range. Given the billionaire deal desk commitment, the Carl Allen trained-buyer pipeline, and the \$10 trillion addressable market with no dominant AI-native competitor, this valuation is conservative relative to category benchmarks.

SECTION 5

The Data Moat & Compounding Advantage

The single most defensible asset in the Kingdom Broker platform is not the code — it is the data and relationships that make the AI increasingly accurate over time. This is the compounding advantage that separates Kingdom Broker from every other tech play attempting to enter the M&A; space.

AI Matching Data	Every deal closed adds to the comparable transaction database. Every buyer profile refines the scoring algorithm. At 100 closed deals the platform becomes difficult to replicate. At 500 it becomes impossible.
Billionaire Deal Desk	A billionaire operator with a 48-company portfolio is training KB's AI on his proprietary acquisition framework — the same methodology he used to build a multi-billion dollar portfolio. This institutional knowledge cannot be purchased, scraped, or replicated.
Sticker Express Proof	\$75K acquisition of a \$300K/yr revenue business. Operated at \$2K/month profit for 12 months. Sold for \$100K. \$49K total return on \$75K invested = 65% cash-on-cash in 12 months. This transaction validates the KB PE Fund thesis before the fund is capitalized.
Carl Allen Pipeline	Hundreds of trained acquisition entrepreneurs need deal flow. Kingdom Broker's AI agents find the deals. This is a proprietary buyer pipeline that no advertising budget can replicate — it requires a decade of relationship building.
Film & Billion-Dollar Deal Relationships	Active involvement in \$5M–\$35M film transactions and connection to a multi-billion dollar acquisition where the acquirer acknowledged a significant obligation to Kingdom Broker. These relationships represent future deal flow and strategic optionality at a level no comparable platform possesses.

SECTION 6

Investment Conclusion

The Kingdom Broker technology platform represents a rare convergence: a fully built and deployed AI-native infrastructure platform, a proven operator with real transaction experience, a proprietary partner ecosystem that took years to assemble, and a \$10 trillion addressable market with no dominant AI-native competitor currently occupying the category.

The \$2,000,000 seed round at a \$15,000,000 pre-money valuation is priced at replacement cost plus a modest ecosystem premium — well below where comparable agentic AI platforms in vertical markets are currently raising. Investors entering at this valuation are acquiring equity in a category-creating platform at category-creation pricing.

Investor Return Scenarios

Scenario	Year 2 Revenue	Multiple	Valuation	Return on \$2M	Notes
Conservative	\$8M	4×	\$32M	\$3.8M (1.9×	Revenue breakeven month 8
Base Case	\$15M	5×	\$75M	\$8.8M (4.4×	Carl Allen + billionaire deal desk active
Optimistic	\$25M	6×	\$150M	\$17.6M (8.8×	Full ecosystem + KB PE Fund compounding

Return scenarios are illustrative projections based on comparable vertical AI SaaS revenue multiples and Kingdom Broker's base case financial model. Not a guarantee of performance.
